Career Objective

Seeking a challenging role in a reputed organization where I can leverage my expertise in Java development, object-oriented programming, and backend technologies to build scalable, high-performance applications. I aim to contribute to the organization's growth by delivering robust software solutions while continuously enhancing my skills in modern frameworks, tools, and industry best practices.

Work Experience

Software developer - Intern

Nov 2024 - Present

Daloft Aerospace - IITMIC

- Designed and developed a functional mobile app with interactive features.
- Created responsive web pages with modern UI/UX principles.
- Implemented backend services using Google Firebase for authentication, database management, and cloud storage.
- Leveraged AWS services for hosting, storage, and scalability solutions.
- Worked on real-world projects, collaborated with a team, and enhanced my debugging and optimization skills.

Associate Backend Developer

Jul 2023 - jun 2024

GRT Jewellery - Tnagar,Chennai

- Database administration and application design
- Experience in Software Development Life Cycle SDLC involving Requirement
- Gathering, Analysis, Logical & Physical Architectural Modeling, Design,

Certification

Java SE11 Developer

- Certified Java developer and having strong knowledge in Java language. Working on developing, testing and maintaining java based application.

Java Fundamentals - IBM

- A course on etrain.skillnetwork.site powered by IBM Developer skills Network that helps to give a deep understanding about development and fundamentals of java language.

Projects

Ticket Booking application

Aug 2024

- Users can register and log in to their accounts to search trains based on source, destination, and date of journey.
- The frontend is built using HTML, CSS, and JavaScript within JSP (JavaServer Pages) to create interactive and user-friendly web pages.
- The backend logic is implemented using Servlets and POJO (Plain Old Java Object) classes to handle business logic and data transfer.
- All booking and user data is stored securely in a MySQL database, and CRUD operations are performed using JDBC.
- This application can be deployed on Apache Tomcat Server and accessed via a web browser and the complete project code is uploaded to GitHub

Students attendance Management System

Sep 2024

- The application provides a secure login system with separate dashboards for administrators and teachers, ensuring proper access control.
- Administrators can add, update, or delete student records and class details through a user-friendly interface.
- The system automatically stores attendance records in a relational database using Spring Data JPA and MySQL
- The application follows the Model-View-Controller (MVC) architecture to ensure a clean and maintainable code structure.
- The backend is developed using Spring Boot, which simplifies configuration and supports rapid development.

Skills

Programming language : Java
Framework : Spring/Sprinboot
Databases : Mysql
Build Tools : Maven
Web Technologies : JSP, Servlets, HTML, CSS, JavaScript
Cloud platform : AWS, Firebase
IDE : Eclipse, VS Code
Deployment : Tomcat server and GitHub

Education

M.Sc. Computer Science

Swami Dayananda college of arts and science, Manjakkudi — Jun 2023
GPA: 7.9

B.Sc. Physics and Computer Science - Double Major

Sastra University, Kumbakonam — Jun 2021
GPA: 6.3

Languages

Tamil / English
